of your heat pump

ISG Connect

HEAT PUMP ACCESSORIES

Comfortable operation of your heat pump

This ISG Connect Internet Service Gateway connects the heat pump to the home network via LAN and enables the heat pump system to be operated using a browser. If the appliance data is also transmitted to the STIEBEL ELTRON Servicewelt (Internet Service Portal), the heat pump can be conveniently controlled from anywhere via the internet using the MyStiebel app. The ISG Connect is a required accessory for use of the SG Ready functions. The ISG can be integrated into an existing building management system via the Modbus TCP/IP data interface. ISG Connect enables control to an output specified by the power supply utility or energy manager (HEMS – Home Energy Management System) via relay contacts or EEBUS protocol.

Product features

- › Browser-based operation of the heat pump in a home network
- › Straightforward use of self-generated photovoltaic power by means of SG Ready function
- › Output control in accordance with §14a of the German Energy Industry Act (EnWG)
- › Reduce energy costs by using dynamic electricity tariffs with EM SmartPrice

Type	ISG Connect
Article no.	206780
Heightmm	82
Widthmm	180
Depthmm	46
CAN	RJ 45
LAN	RJ 45
SG READY (control input)	RJ 10
Application range, min. / max °C	0-45

STIEBEL ELTRON is committed to our policy of continual improvement, some features may have subsequently been changed or even removed. Our advisors will be happy to consult with you regarding the currently applicable equipment features. The images used in this data sheet are for reference only.
